User Involvement

Martin Wynne
CLARIN ERIC
martin@clarin.eu
2014-10-24
Key activities:

- CLARIN's web presence for users – the CLARIN Portal
- Events and activities with users: events, workshops, showcases, working groups, training courses, presentations
- Strategic alliances with the digital humanities
- CLARIN User Involvement Group
- Measuring engagement & describing successes and failures
Some highlights from 2014
Search for Language Resources

Search in the Virtual Language Observatory for language resources in the CLARIN repositories:
(e.g. search for a language or a type of resource)

Using CLARIN for Digital Research
Many researchers in the digital humanities will have heard of CLARIN, and the efforts to build a persistent, reliable and sustainable infrastructure for language resources and tools. Since the... Read more

CLARIN in a nutshell

CLARIN is the Common Language Resources and Technology Infrastructure, which aims to provide easy and sustainable access for scholars in the humanities and social sciences to digital language data (in written, spoken, video or multimodal form), and advanced tools to discover, explore, exploit, annotate, analyse or combine them, wherever they are located. CLARIN is building a networked federation of European data repositories, service centres and centres of expertise, with single sign-on access for all members of the academic community in all participating countries. Tools and data from different centres will be interoperable, so that data collections can be combined and tools from different sources can be chained to perform complex operations to support researchers in their work.

At this moment the CLARIN infrastructure is still under construction, but a number of participating centres are already offering access services to data, tools and expertise. On the services page we show the services accessible at this moment and we explain how and by whom the various services can be accessed.

Workshop associated with the LREC 2014 Conference

26 - 30 May 2014, Reykjavik, Iceland

organised in cooperation with the CLARIN http://www.clarin.eu

NEW: Workshop Programme is available here

NEW: Invited Talk: Elírrikur Rögnvaldsson, Old languages, new technologies: The case of Icelandic
Many researchers in the digital humanities will have heard of CLARIN, and the efforts to build a persistent, reliable and sustainable infrastructure for language resources and tools. CLARIN aims to provide services to support and facilitate support the use of digital language resources and tools in the humanities and social sciences, and has been adopted as a key service in the national roadmaps for research infrastructure in numerous European countries. This tutorial workshop will aim to give a practical introduction to CLARIN, focussing on providing answers to these key questions.

Organisers:

- Martin Wynne, Director of User Involvement, CLARIN ERIC (Oxford e-Research Centre, University of Oxford)
- Christoph Draxler, Project Leader, CLARIN-D Centre at the Bavarian Archive of Speech Signals (BAS), Germany
- Thorsten Trippel, Liaison Coordinator, CLARIN-D, Germany (University of Tübingen)

Multimodal Analysis of "well"
Research and development in speech and language technology are facing a fundamental paradigm shift. More and more speech and language resources, tools and even entire workflows are becoming accessible online in the context of the emerging research infrastructures.

In this tutorial, leading experts in the field of speech and language resources will discuss both opportunities and challenges of online resources. They will present state of the art technology for metadata, web services, persistent identifiers, and human and machine readable online repositories. Showcases and real world applications will illustrate how these technologies can be put into use. The target audience of the tutorial are professionals from speech and language technology development, research and higher education.

Presenters:

- Christoph Draxler, Bavarian Archive for Speech Signals
- Thomas Eckart, Natural Language Processing Group, University of Leipzig
- Daniel Jettka, Hamburger Zentrum für Sprachkorpora
- Alexander Geyken, Berlin-Brandenburgische Akademie der Wissenschaften
- Dieter van Uytvanck, Max-Planck-Institute of Psycholinguistics, Nijmegen

This event is a post-conference tutorial workshop at the LREC 2014 conference.
Creative Camp Hilversum wrap-up

Posted on October 16, 2014 by Max Kemman — No Comments ↓
There has been an increasing interest in bringing corpus linguistics methods to different areas of social sciences and humanities research. This trend is partly motivated by the availability of electronic language collections which sociologists, literary scholars, historians and psychologists use as a potential source of data in their research. The purpose of this special thematic session is to provide an overview of a variety of corpus-based and computational tools, resources and techniques which open new possibilities of language data exploration in those disciplines. We invite paper presentations demonstrating possible applications of corpus analysis tools and methodologies in the exploration of electronic language data in social sciences and humanities.

The session will be initiated with a plenary lecture by Professor Ian Gregory, Lancaster University, and will also feature a series of presentations of the results of the CLARIN-PL project, which showcase the value of corpus data in social sciences and humanities.

Call for Papers

If you are interested in taking part in this session, please send an abstract of up to 600 words to palc@uni.lodz.pl NO LATER THAN 10, September 2014. For specific information about this session please contact Piotr Pęzik at piotr.pezik AT gmail.com

More details coming soon at the conference website http://palc.uni.lodz.pl/.
The first Swedish national SWE-CLARIN workshop

LT-based e-HSS in Sweden – taking stock and looking ahead

Time and venue

The workshop will be organized in conjunction with SLTC 2014, the Fifth Swedish Language Technology Conference, in Uppsala on the morning of the 13th of November 2014.

For registration, please visit SLTC 2014 registration.

Background
Exploring Historical Sources with Language Technology: Results and Perspectives

Supported by CLARIN, NeDiMAH and ESF

Monday, December 8, 2014 - 10:00 to Tuesday, December 9, 2014 - 18:00

Latest practical information

Participants in the workshop are required to make their own arrangements for travel and accommodation, if necessary. There are no official or recommended hotels, but the local organizers have helpfully suggested two convenient options:

Very close to The Hague Central Station and Huygens ING (3 minutes walk):

In the neighborhood of The Hague Central Station and Huygens ING (14 minutes walk):

How can we do more and do better?

• National and international activities: sharing information and expertise, joint activities
• Updating and enhancing the CLARIN portal
• Measuring user engagement

You are all invited to the User Involvement meeting this afternoon!
Thank you for your attention!
