Lärka Overview

- ITG (Borin and Saxena, 2004)
- A system architecture for ICALL (Volodina et al., 2012)
- Lärka

Lärka Overview

- Openly available web-based tool
- Builds on a variety of existing SWE-CLARIN language resources such as
 - Korp for querying corpora (Borin et al., 2012)
 - Karp for querying lexical resources (Borin et al., 2013)
 - language technology tools
- Service-oriented architecture

Presentation overview

- Lärka Overview
- Lärka for learning and teaching
- Lärka as research infrastructure
- Ongoing and future work
- Conclusion

Lärka for learning and teaching

- Two target learner groups:
 - students of (Swedish) linguistics
 - second/foreign language learners
- Automatically generated exercises based on real-life authentic language examples from corpora

Exercises for linguists

- Exercises for linguistic analysis of
 - word classes
 - syntactic relations
 - semantic roles
- Immediate automatic feedback
- Option to send a log to a teacher and students

Exercises for linguists

- Two levels (beginner and intermediate), semantic roles one level
- Three modes:
 - self-study
 - diagnostic test
 - test

Lärka in practice

- Used in Introductions to grammar and linguistics in Sweden and Finland (Volodina et al., 2014; Lindström Tiedemann et al., 2016)
- Labb sessions with teacher
- Discussion of results with fellow students
- Perceived value of platform
- Use in the future

Language Acquisition Reusing Korp

Vad är egentligen laktosintolerans ? Att vara laktosintolerant betyder att man är överkänslig mot laktos (mjölksocker) . Laktos är en kolhydrat som finns naturligt i mjölk och andra mejeriprodukter , till exempel grädde och yoghurt . Laktosintolerans orsakas egentligen av laktasbrist , det vill säga brist enzymet laktas som bryter ner laktos i tunntarmen . Utan laktasenzym förblir laktosen ospjälkad i tunntarmen och går vidare till tjocktarmen där ser mjölksockret bryts ner av bakterierna som finns där och gaser bildas . Detta gör att man kan få magknip , gasbildning , diarré och / eller en känsla av uppblåsthet . Symptomen är individuella och kan variera . En del får väldigt ont medan andra får lindriga besvär . Man kan uppleva att man tål mycket laktos ena dagen och bara lite en annan . Tolerans av laktos kan också till exempel bero på måltidens sammansättning .

Evaluation

Suggested overall level: C1

Given the limited amount of underlying data, this CEFR level should be considered as a suggestion and its use as a basis for decisions in high-stakes assessment is discouraged.
