

***Saturday, October 27* Standards Committee meeting**

During the standards committee session the various national participants reported on national standardization contributions and implementation of standards for their resources.

- Questions left for further discussions are:
- web services and interfaces to web services as part of the standardization committee
- AAI standardization (Shibboleth) as a standard way for authentication of users of the infrastructure
- Quality standards for metadata

The quality standards for centres, such as the service agreements and availability, is not discussed by the standardization committee but by the centre assessment committee.
