University of Tartu Library

The screenshot shows a web browser window displaying the University of Tartu Library website. The browser's address bar shows the URL `www.utlib.ee/index.php?mod=uudised&cmd2=cmd_vaata&t_id=561`. The website header includes the text "Tartu Ülikooli Raamatukogu" and "UNIVERSITY OF TARTU LIBRARY" with the dates "open Mon-Fri 9-22, Sat 11-19, Sun 11-17". Navigation tabs include "subject information", "services", "collections, catalogues", and "about the library".

On the left side, there is a menu with categories such as "E-catalogue ESTER", "EBSCO Discovery", "New arrivals", "Databases", "E-journals and e-books", "Estonian e-textbooks", "EMIL - digitised catalogues", "UT digital archive on DSpace", "EEVA", and "Google Scholar". Below this menu are buttons for "Renewal of due dates", "User Registration", and "User Training".

The main content area features a "NEWS" section with a date of "07.10.2014". The headline reads: "University of Tartu Library helped to assign the first hundred DOI numbers to Estonian research data". The article text states: "In the framework of the DataCite Estonia project, the first hundred unique DOI (Digital Object Identifier) numbers were assigned to the research data in the databank of QSAR models (QsarDB) created at the Institute of Chemistry of the University of Tartu." It further explains that QSAR models are important for describing chemical compounds and that the addition of DOI codes makes research articles more accessible and traceable.

To the right of the article is the DataCite logo and the slogan "Helping you to find, access, and reuse data".

On the right side of the page, there is a "Search on homepage:" field and a list of services including "Conference Centre", "Exhibitions", "Let's talk", "Forum", "FAQ", "Ask a librarian", "E-bookstore", and "Payments".

UT Library and DataCite

- UT is Member of DataCite
- UT Library Coordinates giving DOIs to digital objects

CELR and UT

- CELR is a consortium
 - UT
 - IoC
 - IEL
- CELR is hosted at UT
 - CELR can use infrastructure of UT

DOI in Repository

The screenshot shows a web browser window with the address bar containing the URL: `metasharetest.keeleressursid.ee/repository/browse/estonian-wordnet/807e01024ec911e45a8525400dabf`. The browser's address bar also shows a "Reader" icon. The browser's search bar contains "Apple", "Yahoo!", "Google Maps", "YouTube", "Wikipedia", "News", and "Popular". The browser's tabs bar shows "Facebook", "LINDA...", "Explor...", "natural...", "Digital...", "Tartu...", "Riiklik...", "EKLee...", and "Estoni...".

The page header is orange and features the "META-SHARE" logo, a home icon, and navigation buttons for "Browse Resources", "Community", "Dokumentatsioon", and "Statistics". There are also "Register" and "Login" buttons.

The main content area has a white background and features the title "Estonian Wordnet" with a small "ab" icon. To the right of the title is a small icon showing "7" with a green checkmark and a red "1" with a downward arrow. Below the title are two DOI links: `http://hdl.handle.net/11297/1-00-0000-0000-0001-EEE` and `http://test.datacite.org/handle/10.5072/TY.0001`. A paragraph of text explains: "The atom of a wordnet-type thesaurus is a synonym set (also called a synset), which is a set containing all the synonymous words or multi-word units that express the same concept. All words in a synset belong into the same part of speech." Below this text are three buttons: "« Back", "Download", and "Edit Resource".

Below the main content area are three sidebars. The left sidebar has a yellow header "Distribution" and contains sections for "Availability" (Available - Restricted Use) and "Licence" (CC - BY - NC). The middle sidebar has a yellow header "Lexical Conceptual Resource General Information" and contains sections for "Wordnet" and "Encoding" (Encoding level: Semantics). The right sidebar has a yellow header "Metadata" and contains sections for "Created: 21.03.2014", "Last Updated: 21.10.2014", "Revision: 8", and "Metadata Creator" (Neeme Kahusk).

Editing metadata

The screenshot shows a web browser window titled "Muuda Resource | META-SHARE backend". The address bar shows the URL: https://metasharetest.keeleressursid.ee/admin/repository/resourceinfotype_model/4/. The browser's search bar contains "Apple", "Yahoo!", "Google Maps", "YouTube", "Wikipedia", "News", and "Popular". The browser's tab bar shows several tabs, including "Facebook", "LINDA...", "Explor...", "natural...", "Digital...", "Tartu...", "Riiklik...", "EKLee...", and "Muuda...".

The main content area features the "META-SHARE" logo and navigation buttons: "Browse Resources", "Manage Resources", "Community", "Dokumentatsioon", "Statistics", and "Your Profile, Neeme". There are also "Logout" and "SSO Logout" buttons.

The breadcrumb trail reads: "Kodu > Repository > Resources > Estonian Wordnet".

The page title is "Muuda Resource". Below the title, there are buttons for "Upload resource", "Export Resource Description to XML", "Ajalugu", and "Näita lehel".

A note states: "Fields marked with * are required." Below this, there are sections for "Administrative Information", "Required", "Recommended", "Edit Lexical Conceptual Resource General Info", and "Edit Lexical Conceptual Resource Text Info".

The "Required administration information: Identification, Distribution, Contact person, Metadata" section is expanded to show the "Identification" tab. It contains the following fields:

- * Resource name:** A text input field containing "Estonian Wordnet".
- Language of this entry (RFC 3066 code, preferably from ISO 639-1):** A dropdown menu with "en" selected, labeled "(English)".
- * Description:** A text area containing "The atom of a wordnet-type thesaurus is a synonym set (also called a synset), which is a set containing all the synonymous words or".
- Language of this entry (RFC 3066):** A dropdown menu with "RFC 3066" selected.

Below the "Resource name" field, there is a "+ Add Another Field" button and a note: "The full name by which the resource is known; the element can be repeated for the different language versions using the 'lang' attribute to specify the language."
