Computational Linguistics meets (more and more) Digital Humanities

The Institute for Computational Linguistics “A. Zampolli”, CNR of Pisa, opened a new research unit close of the Centre for Digital & Public Humanities – University Ca’ Foscari Venice.

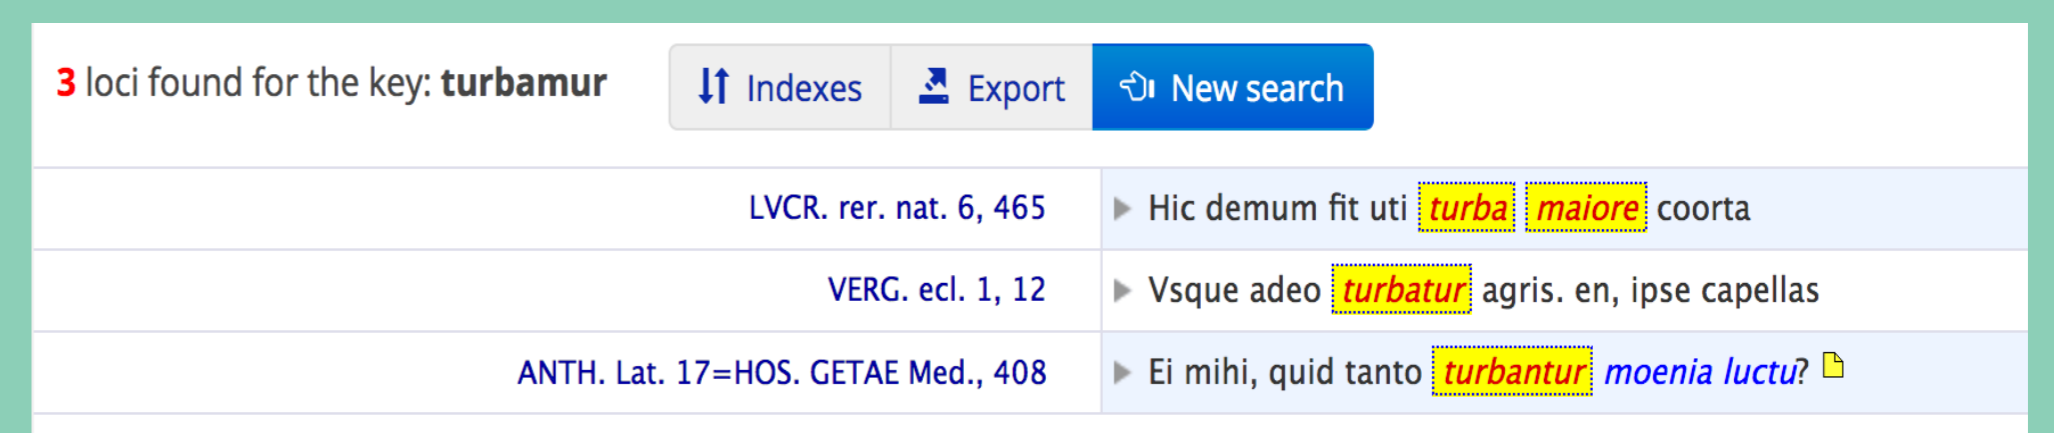

The collaboration is focused on

- creation of annotated multilingual corpora
- development of software components in the domain of Digital Humanities
- Integration of digital resources and computational tools in **CLARIN-IT**

Text acquisition by OCR and collaborative text editing

Commerce Numérique Project – University of Pisa, CNR-ILC, University of Perugia, Caetani Foundation

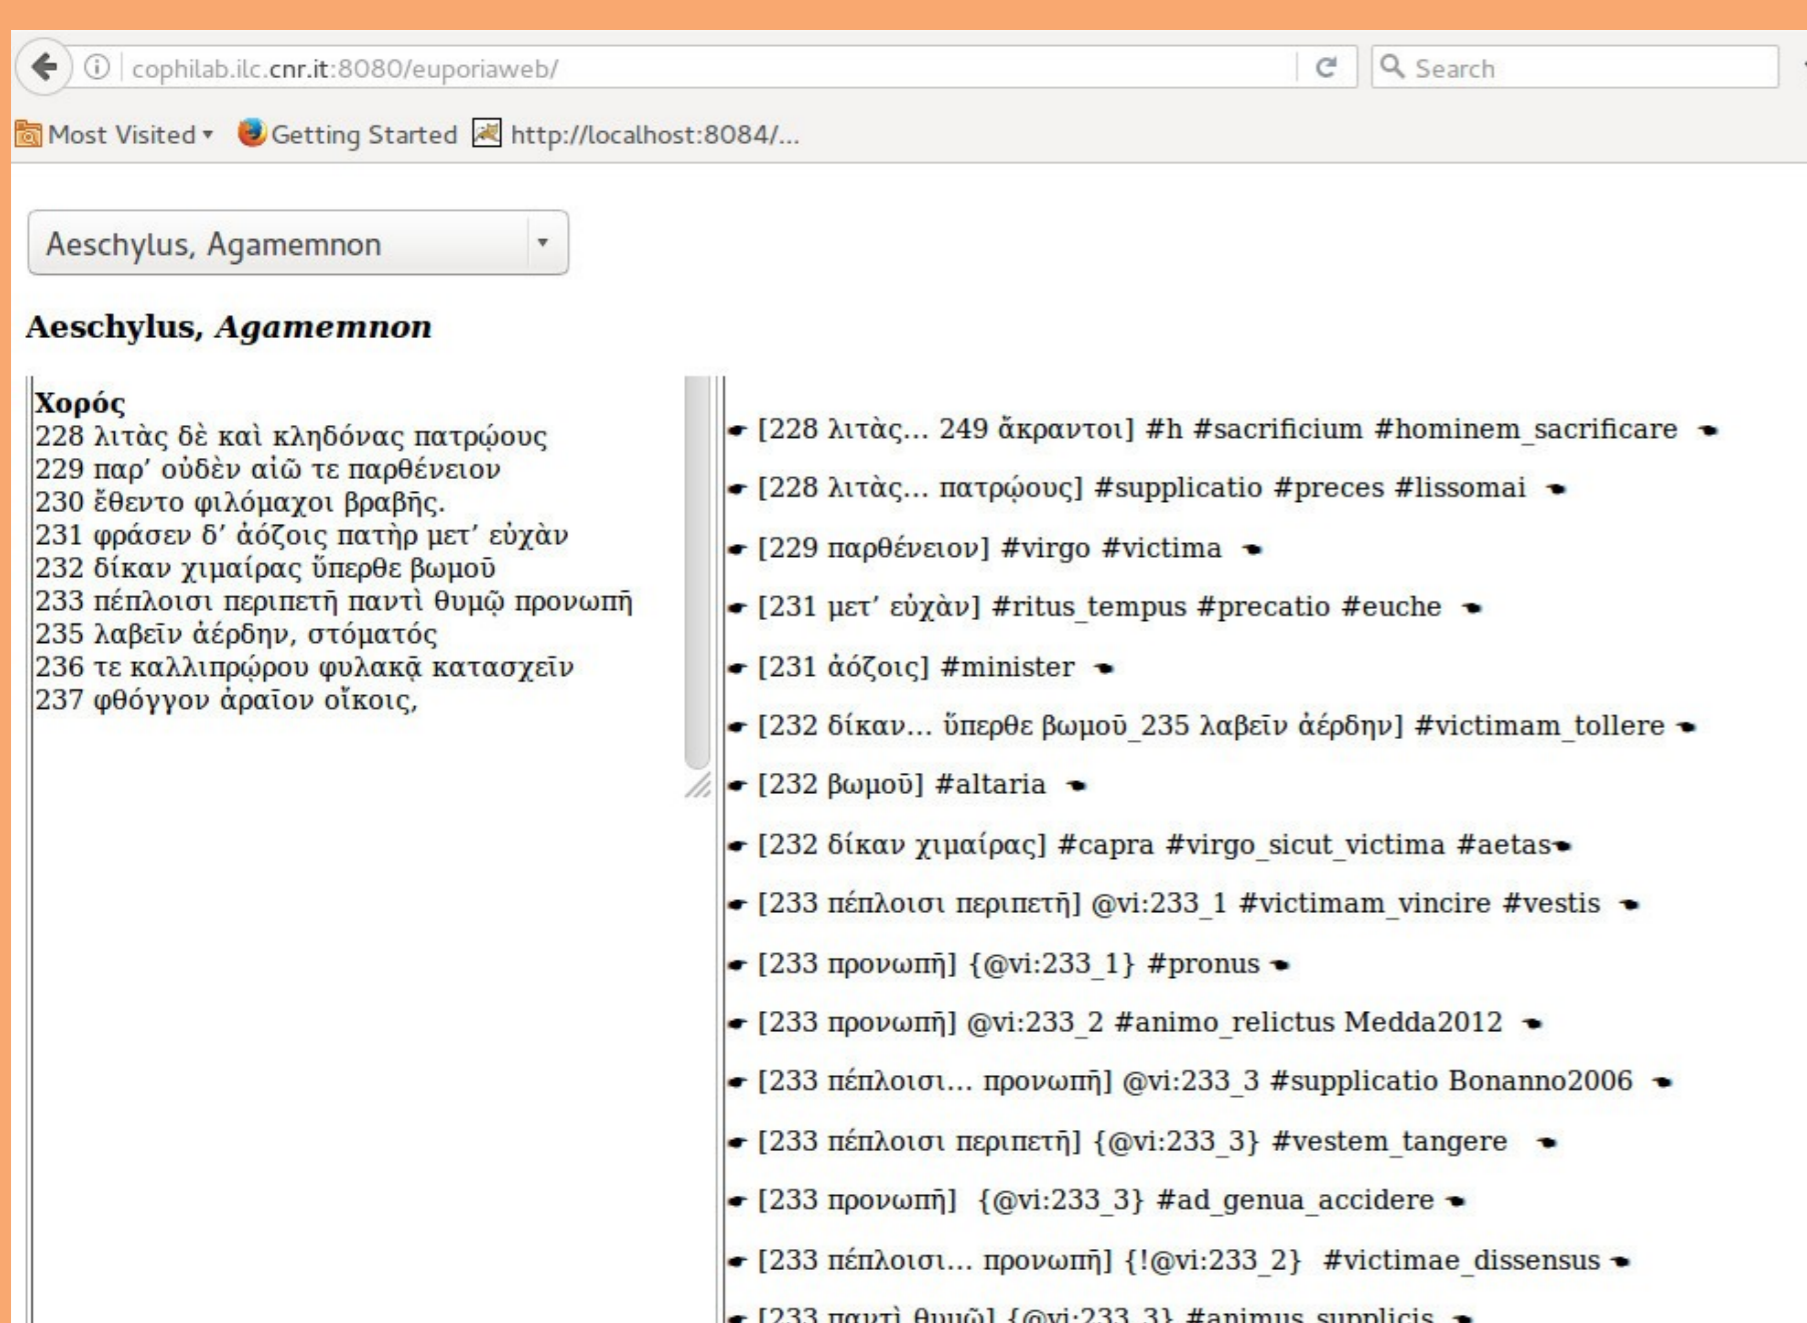

Portantes cogunt ad summa cacumina montis.

465 Hic demum fit uti **turba maiore** coorta
Et condensa queant apparere et simul ipso
Vertice de montis uideantur surgere in aethram.
Nam loca declarat sursum uentosa patere
Res ipsa et sensus, montis cum ascendimus altos.

465
turba maiore Marullus
turbam mor
turbamur

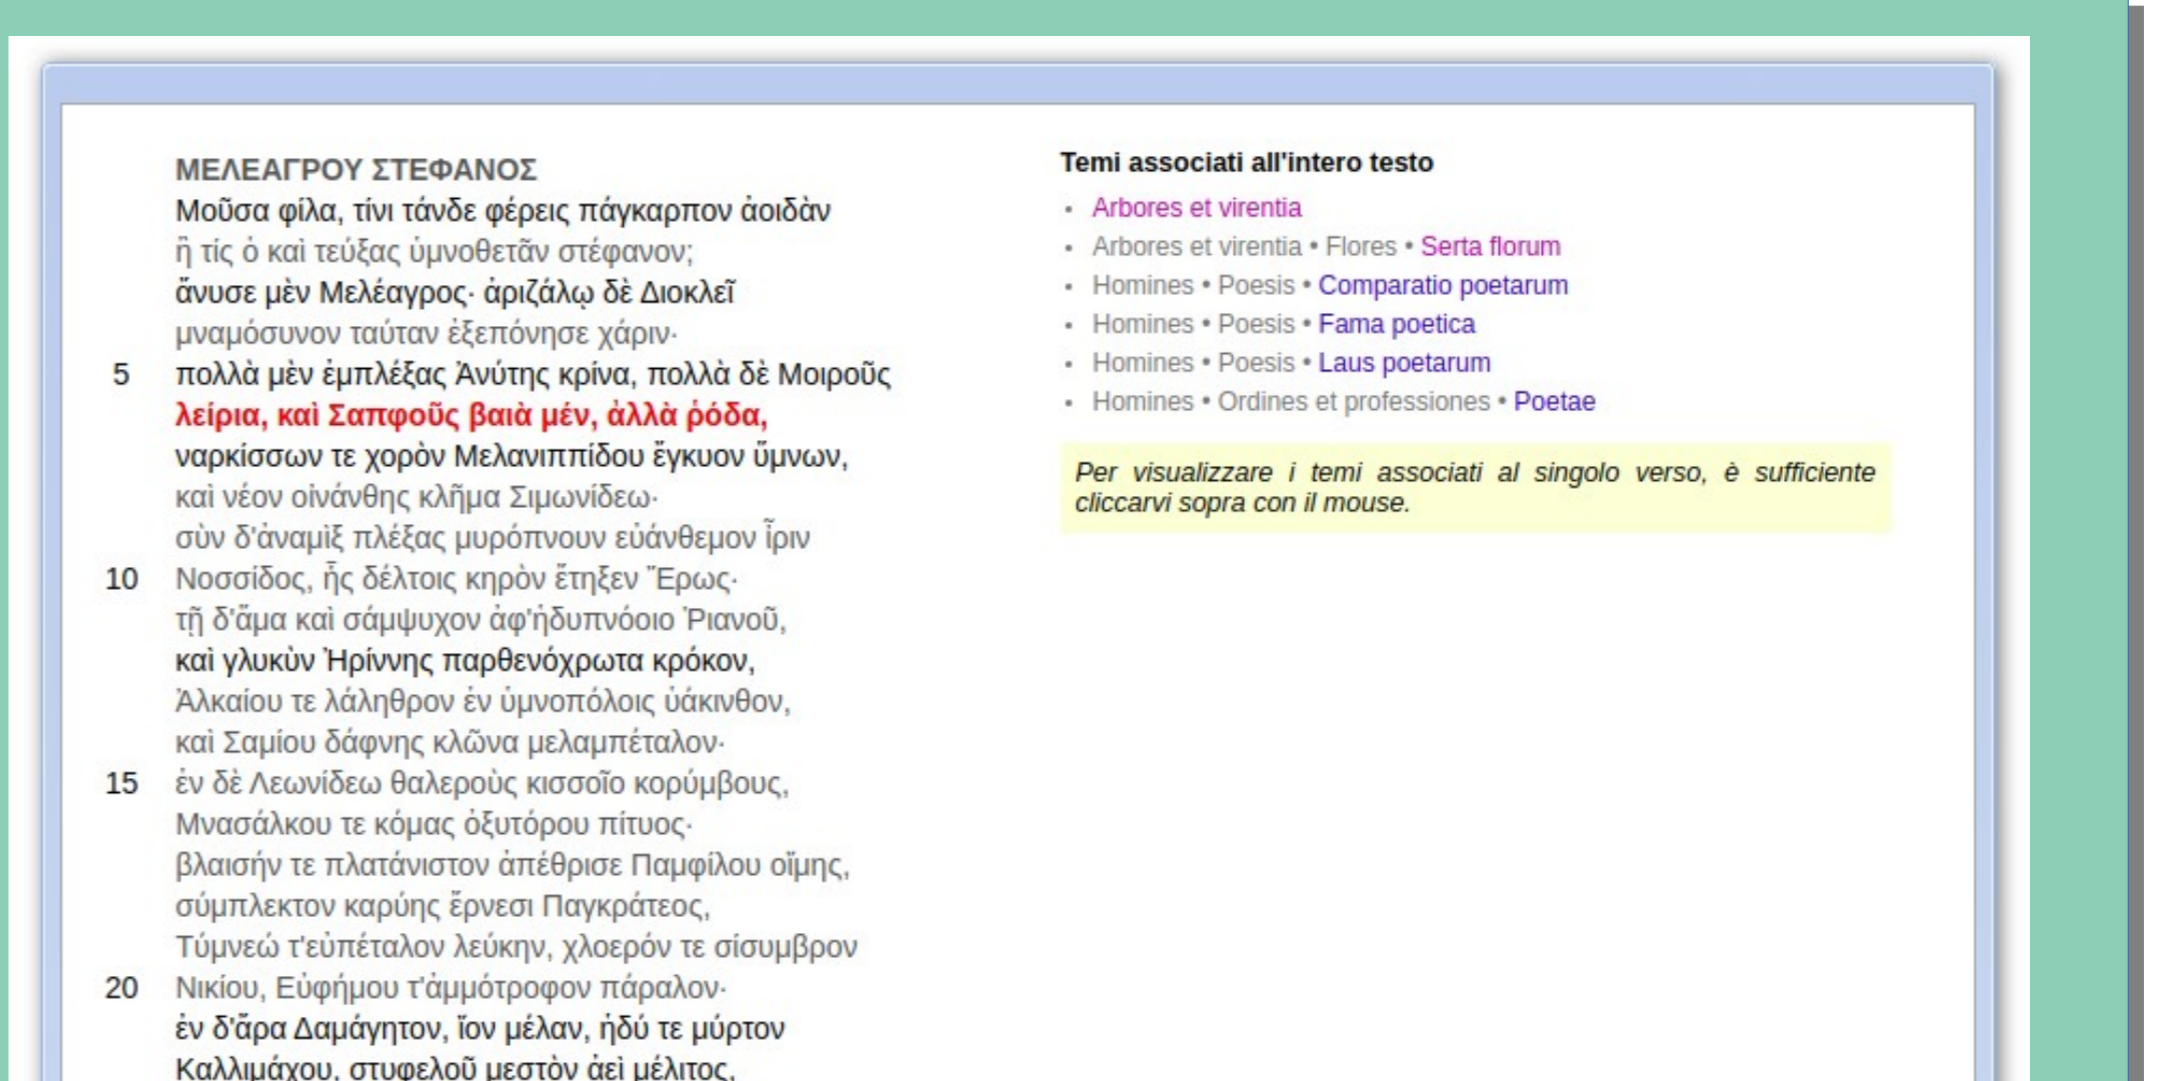

Musisque Deoque

A digital archive of Latin poetry – PRIN 2005 and 2007 project led by Ca’ Foscari University Venice <http://mizar.unive.it/mqdd>

Collaborative textual annotation based on Domain Specific Languages

Euporia Project – CNR-ILC, University of Pisa, Liceo “Gargallo” (Siracusa), Liceo “Galilei” (Pisa)

Memorata Poetis

A thematic annotated corpus – PRIN 2010/11 project led by Ca’ Foscari University Venice <http://www.memoratapoetis.it>
