and Research

and others

Open Network of Centres

- Certified data centres
 - Common technical infrastructure and standards
 - Data management services for third parties
- Part of the European network
- Open network architecture

Sponsored by

-  Centres part of the consortium
-  Associated centres
-  Cooperating computing centres

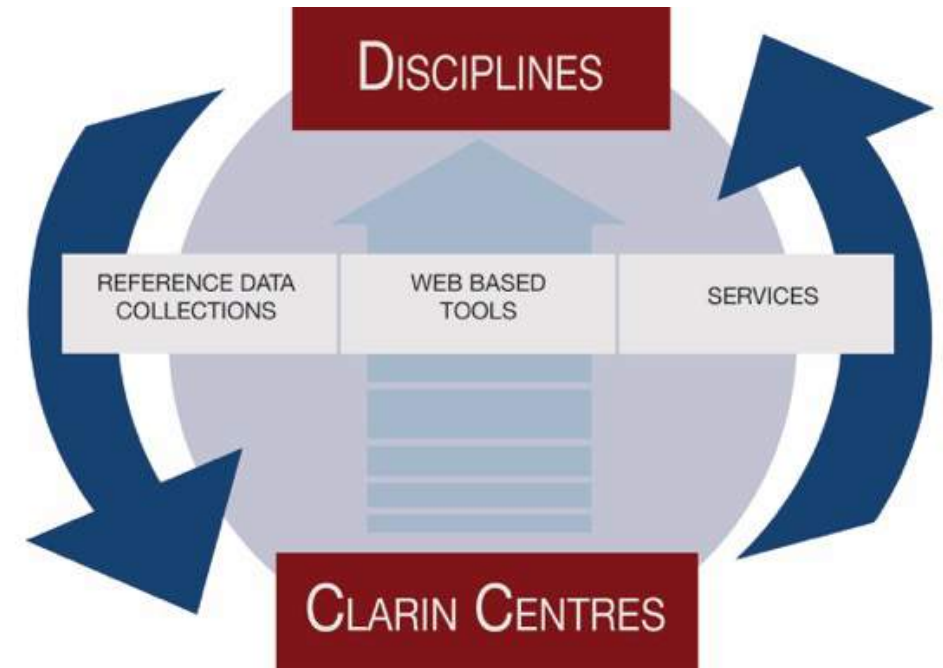

- Competence Area: Historical Data (KB-HD)
- Competence Area: Contemporary Data – Spoken/Written (KB-GD)
- Competence Area: Community Embedding (KB-DH)
- Competence Area: Technical Infrastructure (KB-TI)
- Consortium Administration, Coordination, and Management

Sponsored by

CLARIN-D Working Groups

- F1: German Philology
- F2: Other Philologies
- F3: Linguistic Fieldwork, Anthropology, Language Typology
- F4: Human Speech Processing: Psycholinguistics, Cognitive Psychology
- F5: Speech and other Modalities
- F6: Applied Linguistics, Computational Linguistics
- F7: Content Analysis in the Social Sciences
- F8: History

Sponsored by

Federal Ministry
of Education
and Research

- Interface between infrastructure providers and scientific community
- Organizing community engagement
- Identifying community requirements and desiderata
- Identifying and documenting use cases
- Advising the infrastructure providers on integration and curation of resources
- Dissemination of CLARIN-D services into the scientific communities

CLARIN-D Impact

- 479 cooperating projects
- > 33,000 registered users
- > 800 licences
- > 170,000 downloads of resources per year
- 4,264,492 service calls (uses of webservice) in the reporting period
- 35 identified disciplines
- 19,019 website visitors in the reporting period
- 395 support requests, over 90% closed successfully.

CLARIAH-DE

- Project sponsored by BMBF (Federal Ministry of Education and Research)
- Duration: 1 March 2019 – 31 March 2021
- Goals of the joint project
 - CLARIAH-DE consolidates previously separate offers (DARIAH-DE and CLARIN-D)
 - Advancing joint services for scholars in the humanities and social sciences in preparation of a National Research Data Infrastructure (NFDI)

www.clariah.de

The screenshot shows the homepage of the CLARIAH-DE project. At the top left is the CLARIAH-DE logo, followed by a navigation menu with links for 'About', 'Project description', 'Partner', 'Contact', and 'Legal Information'. On the top right, there are flags for the United Kingdom and Germany. The main header is a dark blue banner with the text 'CLARIAH-DE: Joint Services of CLARIN-D and DARIAH-DE' in white. Below this is a white section titled 'About' which contains three paragraphs of text. The first paragraph describes the merger of CLARIN-D and DARIAH-DE. The second paragraph details the interests and goals of both networks. The third paragraph explains the consolidation into CLARIAH-DE and its funding by the German Federal Ministry for Education and Research (BMBWF). At the bottom left, there is a logo for the German Federal Government (Bund) and the text 'GEFÖRDERT VOM Bundesministerium für Bildung und Forschung'. At the bottom right, there is a secondary navigation menu with links for 'Legal Information', 'Privacy', 'Contact', 'Disclaimer', and 'Data'.

CLARIAH-DE: Joint Services of CLARIN-D and DARIAH-DE

About

CLARIAH-DE is the merger of the two research infrastructure networks [CLARIN-D](#) and [DARIAH-DE](#). In this joint project, the two established research infrastructures will be merged over the course of two years (2019-2021). Thus, academic endeavours of researchers from the humanities and cultural sciences who work with complex digital tools and special data repositories shall be substantially facilitated.

[CLARIN-D](#) and [DARIAH-DE](#) are connected through their interest in the digital investigation of textual and linguistic sources from the perspective of the humanities and cultural sciences. Both networks have specialised on particular research areas for about a decade. The aim of [CLARIN-D](#) is the establishment of a network of centres intimately entwined with particular disciplines, which shall then serve as a backbone of a research infrastructure for researchers in the humanities and social sciences in particular. The different disciplines cover a wide array of the Humanities for which linguistic resources play a major role in research. [DARIAH-DE](#) on the other hand, supports research working with digital methods and procedures in the humanities and cultural sciences with a broad research infrastructure consisting of the four pillars teaching, research, research data and technical components.

The consolidation of the two networks' infrastructures into CLARIAH-DE is an important milestone on the way to a shared space for the cooperative, digitally supported research in the humanities and the cultural and social sciences in Germany and Europe. The project is supported by the [Federal Ministry for Education and Research \(Bundesministeriums für Bildung und Forschung, BMBWF\)](#) and aims to contribute to the further development of the national research infrastructures.

GEFÖRDERT VOM

 Bundesministerium für Bildung und Forschung

Legal Information Privacy Contact Disclaimer Data

- Construction of a National Research Data Infrastructure (Nationale Forschungsdateninfrastruktur – NFDI)
- Joint initiative of the Federal Government and the Länder toward institutional funding of research infrastructures
- Three calls for NFDI consortia in all areas of science (2019-2021)
- Deadline for the first call: October 15, 2019

Sponsored by

TEXT+ more than 40 partner institutions

- Universities
- Libraries
- Data Centres
- Members of the Union of the Academies of Sciences and Humanities
- Research institutes of the Max-Planck-Society
- Research institutes of the Leibniz Association

- Successful start to CLARIAH-DE

Welcome to CLARIN-D

Humanities, Cultural and Social Sciences work with sources which are either produced by the projects themselves, collected, or taken from archives. CLARIN-D is a research infrastructure that helps researchers of Humanities, Cultural and Social Sciences with [accessing](#), [preparing](#) and [analysing](#) of research data. CLARIN-D also offers information on a wide range of topics, including [teaching material](#), [help on data management plans](#) and other, [discipline-specific support](#).

Once a researcher has found interesting research data that is provided for the research community,
