GOTRIPLE: Building an innovative discovery platform for the social sciences and humanities

WHY TRIPLE PROJECT?

• Strong fragmentation of SSH research
• SSH open scholarly resources (data, publications, other researchers’ profiles and projects) currently scattered across local repositories
• Low use and reuse of SSH research
• Interdisciplinary collaboration possibilities are missed
• Societal impact is limited

GOTRIPLE: Building an innovative discovery platform for the social sciences and humanities

Main impacts

- User-orientation
- Integration into the European Open Science Cloud (EOSC)
- Strong ties between research, industry and society
- Contribution to the objectives of Open Science
- Reconnection of culture and science

Main goals

- Overcome fragmentation of SSH research
- Ensure explorability, findability, accessibility, (re)usability of SSH resources
- Support scientific, industrial and societal applications of SSH science
- Foster interdisciplinary and cross-cultural collaborations
- Develop innovative tools to support the whole research cycle

Contribution to the objectives of Open Science

- Increase economic and societal impact of SSH resources
