

The PARTHENOS project

PARTHENOS CEE Workshop 07-09 Oct 2019

Steven Krauwer CLARIN ERIC / Utrecht University

PARTHENOS STANDS FOR...

PARTHENOS

Pooling Activities, Resources and Tools
for Heritage E-research Networking,
Optimization and Synergies

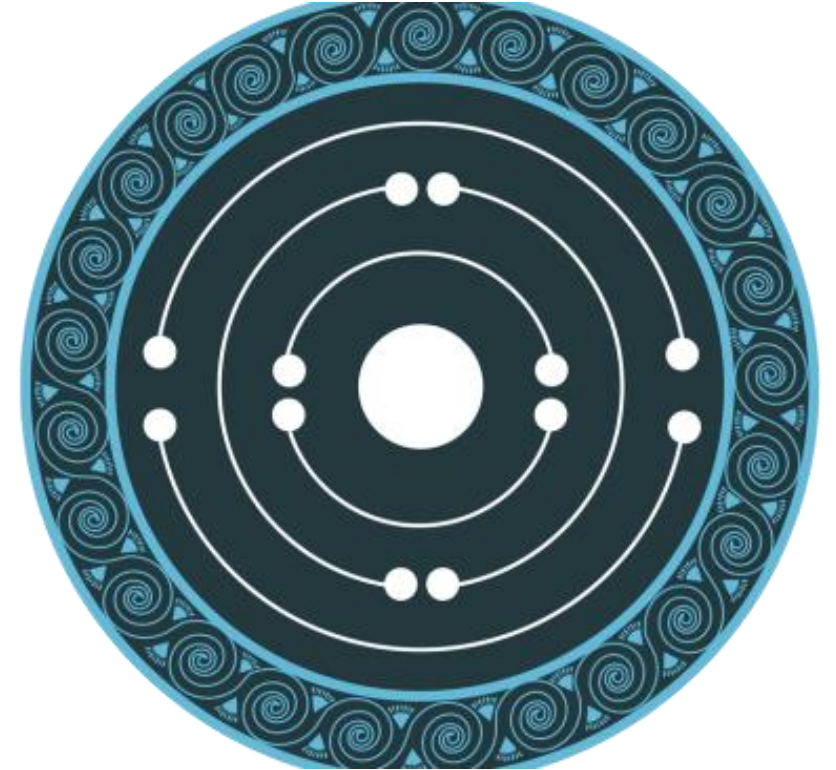

PURPOSE

The PARTHENOS project empowers digital research in the fields of **History, Language Studies, Cultural Heritage, Archaeology, and related fields across the (Digital) Humanities**. It provides a thematic cluster of European Research Infrastructures (**CLARIN** and **DARIAH**), integrating initiatives (infrastructure projects), e-infrastructures and similar world-class infrastructures, and builds bridges between different, tightly interrelated fields.

Investing in culture is investing in the future!

PARTHENOS FACTS

- PARTHENOS is a Horizon2020 project, funded by the EC
- Horizon2020 is the European Research and Innovation Programme
- EC contribution to PARTHENOS: 12 million EUR
- PARTHENOS runs for 54 months
- Starting date: 1 May 2015
- Closing date: 31 October 2019 (24 days to go ...)
- PARTHENOS has a consortium of 16 partners from 9 countries
- Coordinator: PIN Scrl - Educational and Scientific Services for the University of Florence, Italy

WHY PARTHENOS?

Digital technologies have led to the creation of large digital archives, and to a variety of innovative research methodologies applicable to these archives. PARTHENOS works towards integrating these archives and new methods to support digital research.

PARTHENOS ...

... supports the work of the two main research infrastructures, CLARIN (language resources) and DARIAH (digital humanities), as well as various integration projects addressing cultural domains, such as ARIADNE, CENDARI and EHRI.

By working together, PARTHENOS will:

- develop common standards to ease exploitation;
- coordinate joint activities among research projects;
- harmonize policy definition and implementation;
- pool methods and services;
- and share solutions to the same problems.

PARTHENOS' WORK PACKAGES

PARTHENOS has 8 Work Packages

We give an overview, plus main results
from each of them

PARTHENOS' WORK PACKAGES (WP's)

WP nr.	WP Title	Lead
1	Project coordination and management	PIN
2	Community involvement and requirements	CLARIN
3	Common policies and implementation strategies	KNAW
4	Standardization	INRIA
5	Interoperability and semantics	FORTH
6	Services and tools	CNR
7	Skills, professional development and advancement	TCD
8	Communication, dissemination and outreach	KNAW

Results WP1 (Management) - WP2 (Requirements)

- WP1 Results (Management)
 - Lots and lots of administrative, management and financial work.
- WP2 Results (requirements)
 - Huge collection of user requirements for the aspects covered by the other WPs from all relevant disciplines
 - A methodology for collecting and describing user requirements
 - See <http://www.parthenos-project.eu/resources/projects-deliverables#1523355493949-5f9f9f1f-28dc> for the reports

Results WP3 (Common policies)

The PARTHENOS Guidelines

- A comprehensive set of PARTHENOS Guidelines to FAIRify data management and make data reusable is focusing on the topic of common policies. This compact guide offers twenty guidelines to align the efforts of data producers, data archivists and data users in humanities and social sciences to make research data as reusable as possible based upon the FAIR Principles. Each guideline has recommendations for both researchers and archives as it is recognised that different priorities may apply to each case.

The Policy Wizard

- The Policy Wizard is a tool which helps researchers to discover which data policy applies best to their particular data. It allows the user to select an area of interest, for example History, and find a range of policies suggesting how data should be collected, processed, stored and shared with other researchers.

More on

- http://www.parthenos-project.eu/portal/policies_guidelines

Results WP4 (Standardization)

The Standardization Survival Kit (SSK)

- The Standardization Survival Kit (SSK) is designed to support researchers in selecting and using the appropriate standards for their particular disciplines and work flows.
- It is an online tool which focuses on giving researchers access to standards in a meaningful way by using research scenarios which cover all the domains of the Humanities, from literature to heritage science, including history, social sciences, linguistics, etc.
- See it on <http://ssk.huma-num.fr/#/>

Results WP5-6 (Interoperability, services and tools)

PARTHENOS Virtual Research Environment

- An online environment that integrates cloud storage with services and tools and support collaborative working throughout the research data lifecycle, promoting sharing, reuse and sustainability within the Humanities.
- See it on https://parthenos.d4science.org/web/parthenos_vre

Results WP7 (Training)

The PARTHENOS Training Suite

- Training modules and resources for researchers, educators, managers, and policy makers who want to learn more about research infrastructures and related issues and topics.
- See <https://training.parthenos-project.eu/>
- ... and listen to Darja's presentation

Results WP8 (Dissemination and International collaboration)

The HUB

- The PARTHENOS Hub is envisioned as an open accessible publication and interaction platform for the humanities research communities. It experiments with combining the traditional format of publishing in journals with the more dynamic, interactive new media (such as blogs, internet forums and social networks). The Hub consists of different issues, each dedicated to a specific topic.
- See it on <http://www.parthenos-project.eu/portal/the-hub>

International collaboration

- One of the main objectives of PARTHENOS is to enhance collaboration and to cluster initiatives. Therefore from the start of the project, one task has been dedicated at coordinating and pooling existing liaisons and proposing joint plans for fostering these connections.
- This workshop is one of the outcomes (together with many others)
- See <https://www.parthenos-project.eu/portal/international> for more information

Concluding remarks

- The PARTHENOS project is almost over as a project, but it has left us with a very valuable heritage, which will be adopted and further developed by the Research Infrastructures that were the main stakeholders in the project
- All information about the project can be found on
 - <https://www.parthenos-project.eu/>
- PARTHENOS is a Horizon 2020 project funded by the European Commission under Grant Agreement n. 654119.

-000-

THANKS!
